

# LINA FORERO

## DATA ANALYST

### PROFILE

I enjoy turning complex and messy data into clear insights that help teams understand what is happening, identify opportunities, and make better decisions. As a Junior Data Analyst with 5+ years of experience in healthcare, insurance, and operations, I have a strong understanding of the business processes behind the data, while my training in SQL, Python, Excel, and data visualization allows me to analyze, clean, and communicate that data effectively. Experienced in exploratory data analysis, KPI reporting, statistical analysis, data validation, and dashboard development, with a strong interest in using data to improve processes and business performance.

### PERSONAL INFORMATION

Bogotá, Colombia

### LANGUAGES

- Spanish - Native
- English - C1 Advanced

### TECHNICAL SKILLS

#### **Data Analysis:**

Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, Hypothesis Testing, Trend Analysis, KPI Analysis, Data Validation

#### **Programming & Querying:**

Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn), SQL (Joins, Aggregations, Filtering, Subqueries)

#### **Business Intelligence & Visualization:**

Power BI, Tableau, Excel, Dashboard Development, Data Visualization, Reporting

#### **Analytics:**

Descriptive Statistics, Inferential Statistics, t-tests, ANOVA, Time-Series Analysis

#### **Tools:**

Jupyter Notebook, GitHub, Google Workspace

#### **Business & Operations:**

Healthcare Operations, Insurance Claims & Eligibility, Process Improvement, Customer Data Management, Performance Metrics

### ACADEMIC PROJECTS

#### **Video Game Market Analysis**

TripleTen Bootcamp – Data Analyst | 2024

- Conducted comprehensive analysis of historical video game sales data to identify success patterns and support marketing strategies for a global online store.
- Built predictive models to identify high-potential games.
- Analyzed trends by region and genre.
- Performed hypothesis testing to validate business insights.

**Skills:** Python (Pandas, NumPy, Matplotlib, Seaborn), statistical analysis, data cleaning, data visualization

## Taxi Trip Pattern Analysis

TripleTen Bootcamp – Data Analyst | 2024

- Performed statistical analysis of taxi trip durations under different weather conditions to optimize urban transportation operations.
- Applied Student's t-tests to compare independent groups.
- Filtered and segmented data based on specific criteria.
- Generated actionable insights on user behavior.

**Skills:** Python (Pandas, SciPy), hypothesis testing, inferential statistics, time-series data manipulation

## PROFESSIONAL EXPERIENCE

Administrative Assistant | 2024 - Present

VL - Valley Perinatal and Advanced Women's Care

### Responsibilities

- Manage patient, insurance, referral, scheduling, and administrative data across multiple healthcare workflows.
- Verify insurance eligibility, benefits, and referral information to support accurate patient scheduling and billing processes.
- Maintain and update structured patient records and databases, ensuring data accuracy, consistency, and accessibility.
- Collaborate with providers and administrative teams to resolve data discrepancies and improve operational workflows.

### Key Achievements

- Supported data and administrative workflows across 10 office locations, maintaining consistency and accuracy across high-volume operations.
- Identified recurring patterns in scheduling and patient flow, contributing to improved appointment coordination and operational efficiency.
- Identified inconsistencies in patient and insurance information before they affected downstream workflows, helping reduce scheduling and billing discrepancies.
- Applied data validation and process review to support faster resolution of administrative issues and more reliable healthcare information.

Receptionist, Front Desk | 2023 - 2024

Microtel Inn - Tuscaloosa, AL, USA

### Responsibilities

- Managed reservation, scheduling, customer, and financial transaction data using internal systems.
- Maintained accurate records and updated information to support daily hotel operations.
- Monitored financial transactions and ensured accurate recording within accounting systems.

### Key Achievements

- Improved accessibility of operational records by maintaining organized and consistently updated information.
- Supported occupancy and resource allocation decisions through accurate management of reservation and scheduling data.
- Helped maintain accurate financial records by monitoring and validating transaction information.

Team Support Specialist | 2022 - 2023

Full Potential Solutions - Frontier Communications

### Responsibilities

- Monitored team performance data, operational KPIs, and quality metrics.
- Audited performance information to identify trends, recurring issues, and performance gaps.
- Prepared internal reports and performance insights for management and operational teams.

**Key Achievements**

- Identified performance trends and recurring operational issues, helping management focus improvement efforts on specific areas.
- Used KPI and quality data to support data-driven operational decisions and performance improvement initiatives.
- Translated performance data into actionable reports and insights for management.
- Supported process improvement by identifying gaps in team performance and recommending areas for operational optimization.

**Insurance Specialist (UHC) | 2021 - 2022**

Optum - United Healthcare

**Responsibilities**

- Processed and validated insurance claims, eligibility, policy, and member information.
- Investigated discrepancies across claims and insurance records to identify data inconsistencies.
- Collaborated with healthcare providers and insurance teams to resolve claim and data-related issues.

**Key Achievements**

- Improved claim-data accuracy by identifying and resolving inconsistencies before they affected downstream processing.
- Supported timely claim submission by validating required information and addressing discrepancies.
- Helped reduce processing delays by coordinating with providers and insurance teams to resolve data-related issues.
- Applied healthcare and insurance domain knowledge to interpret claims and eligibility information accurately.

**Insurance Specialist (Cigna) | 2020 - 2021**

Concentrix - Cigna Pharmacy

**Responsibilities**

- Processed and validated insurance claims and member information according to established procedures.
- Reviewed claims and policy information to identify discrepancies and data inconsistencies.
- Collaborated with internal teams to resolve insurance-related issues and maintain accurate records.

**Key Achievements**

- Identified recurring data inconsistencies in claims and policy information, supporting more accurate and efficient processing.
- Helped improve workflow efficiency by resolving insurance-data issues and coordinating with internal teams.
- Maintained accurate insurance and customer information while handling high-volume operational processes.

**EDUCATION****Data Analyst**

TripleTen - Certificate | 2026

**Project Management**

Coursera - Certificate | 2024

**CRM management**

Coursera - Certificate | 2024

**Physical Therapy**

Universidad del Rosario | 2014 - 2019

**High School Diploma**

Colegio Fundación Colombia | 2000 - 2012
